Known issues

- **B11:** hardware decode falls back to software: the add-on may not open any decoder device ("Operation not permitted"). The start-up report's overlay warning is false: the decoder is named rpi-hevc-dec on this kernel.
- **B27:** Enhanced View is black for a few seconds after a return to the page.
- **C23:** the Storage tab hides the file names on a phone held upright.
- **C25:** a better on/off design for Remote Storage.
- **B6:** the Microseven is not tested.
