AnyCam 3.9.0 Audit Report

Release audit - 25 October 2026 - stable release - tag 3.9.0

3.9.0 is the code of 3.9.0-rc2.0 with the version changed; CrystalHeeler ordered it on 2026-10-25. Home Assistant could not install 3.9.0-rc2.0 over 3.9.0-rc1.0 (F11: its version library cannot read "rc2.0"); a final version reads as newer than any rc, so 3.9.0 installs from the update dialog.

The items of the line are audited in the 3.9.0-rc1.0 and 3.9.0-rc2.0 reports: B68, B69, B79, B72, B70, B74, B71, B73, B81, B78, B80, C31, B58, B63, B62 (first steps), C30, B84 and B85.

Tests run

Suite	Result	Scope
Release gate	**PASS**	Eight gates, the same 63 contracts as 3.9.0-rc2.0.
Python integration	**PASS**	812 of 812.
JavaScript behaviour	**PASS**	217 of 217.
Recording replay	**PASS**	From 3.9.0-rc2.0: 409 recordings, unchanged code.
Field	**NOTED**	3.9.0-rc1.0 ran one night on Test System B; 3.9.0-rc2.0 was not installed in the field (F11).

Not tested

- **B84 and B85 in the field.** 3.9.0-rc2.0 could not be installed from the update dialog; 3.9.0 is its first field run.
- **The Pi's memory** with the 17.25 s recording buffer.

Best-practices compliance

Standard	Check applied	Result	Note
Rule 5	Full version numbers	**PASS**	3.9.0 in config.yaml, the code and the changelog heading.
Rule 9 (privacy)	New text	**PASS**	No names or addresses.

Files changed

File	Change
camera_discovery.py, config.yaml	3.9.0.
CHANGELOG.md	The 3.9.0 entry.
docs	Build plan; this report.
