AnyCam 4.1.2 Audit Report

Release audit - 26 October 2026 - C34 and C35 - tag 4.1.2

Scope confirmed by CrystalHeeler on 2026-10-26: C34 and C35 (both the per-device choice and the automatic switch). C35 answers B62: the phone's ZeroTier link to the Pi is RELAY (zerotier-cli peers on the Pi), it lost about a quarter of WebRTC's packets, and CrystalHeeler will not open firewall ports.

The changes

Item	Change
C35	liveModeNow(): Automatic (WebRTC, or MSE for 12 h after a live view lost 5% of its packets or froze 3 times in its first 20 s), WebRTC, or Remote (MSE). Kept in the browser (localStorage, every access in try/catch: a blocked store means WebRTC). Cards and Enhanced View use it; a change restarts the live views. MSE jumps to the live edge when more than 2 s behind (go2rtc's player only speeds up). The choice is in Enhanced View's bar, also on a phone held upright.
C34	A red pulsing border on a recording camera's card and around Enhanced View, set by the 3 s motion poll; still for reduced motion.

Tests run

Suite	Result	Scope
Release gate	**PASS**	Eight gates.
Python integration	**PASS**	848 of 848; AY5 for the styles and the Live choice.
JavaScript behaviour	**PASS**	230 of 230; C35 modes over time and with blocked storage; the automatic thresholds; the live-edge jump; C34. B39 kept (the disconnect hook merged).
Visual (rule 10)	**PASS**	Enhanced View's bar at 375x812 (measured: all inside 375 px) and 812x375; the border at 1366x768. Found and fixed: the phone rule hid every label in the bar, so the Live choice was hidden on a phone held upright.
Field	**NOTED**	Not run.

Not tested

- **MSE over the relayed ZeroTier link.** On 24 Oct the Microseven's 4K Enhanced View got no video within 15 s over MSE on that link; cards (smaller streams) were not tried over MSE. The field test decides whether Remote is steady there.
- **The automatic switch on a real phone**, and the toast it shows.
- **Safari and the HA app's web view** with MSE (ManagedMediaSource on iOS).

Best-practices compliance

Standard	Check applied	Result	Note
Rule 10	Bars fit every screen	**PASS**	Measured on screen at the three sizes.
Storage	Browser storage never required	**PASS**	try/catch; WebRTC when blocked.
Rule 7	Version and scope confirmed	**PASS**	CrystalHeeler, 2026-10-26.
File names	Dashes	**PASS**	This report and its script.
Rule 9 (privacy)	New text	**PASS**	No names or addresses.

Files changed

File	Change
page_script.py	C35 mode, automatic switch, live-edge jump; C34 marks.
anycam_page.py	The Live choice; the border styles; the phone rule.
tests/	AY5; page checks.
CHANGELOG.md, config.yaml, camera_discovery.py, docs	4.1.2; the plan; the CEC research (docs/CEC-and-TV-Research.md, .html, .pdf).
